Distillery story (short, scroll-friendly)

Cousins Distillery was born from a shared belief: spirits should be as refined as the moments they accompany.

Founded by kindred spirits with a deep respect for craftsmanship, we began with a simple but demanding vision—to create spirits of exceptional purity, balance, and character. This led us to develop a **13-stage distillation process**, a disciplined method that removes impurities while preserving the subtle aromas and silky texture that define our house style.

Today, Cousins Distillery is no longer just about vodka; it is a **house of spirits**, where vodka, Blue Agave Spirit, tequila, and whiskey are all crafted under the same exacting standards.

How we craft (13-stage distillation, in one block)

At Cousins Distillery, craftsmanship lives in the details.

Each spirit is refined through a **13-stage distillation process**, a carefully calibrated sequence of purification, separation, and polishing. This method ensures a cleaner, smoother, more refined spirit while maintaining its natural character and depth. For the

guest, this means a refined mouthfeel, a clean finish, and a sensory experience that feels truly elevated.
